Youngmin Park  
Department of Mathematics  
University of Pittsburgh

Dear Dr. Robert Gütig:

My name is Youngmin Park. I am a graduate student at the University of Pittsburgh department of mathematics, working in the areas of weakly coupled oscillators and neural field models. I expect to receive a Ph.D. from the University of Pittsburgh in May of 2018 under the direction of my advisor Bard Ermentrout. I would like to apply for a postdoctoral position in your group.

With my application, I include the standard AMS cover letter, a curriculum vitae, a research statement, and a list of references.

Some highlights of my file are:

1. Andrew Mellon Predoctoral Research Fellowship award recipient
2. Journal publications in SIAM Journal on Applied Dynamical Systems and Springer Journal of Computational Neuroscience.

I understand that my work is largely applied math, but I am more than willing to transition to theoretical neuroscience.

Please let me know if there is anything else I can provide. Thank you in advance for your consideration.

Sincerely,

Youngmin Park
